# 1. Overview

---

This document details the conformance of the Idox Public Access 3.x product to the World Wide Web Consortium (W3C) [Web Content Accessibility Guidelines \(WCAG\) 2.1](#).

*“WCAG 2.0 and WCAG 2.1 are stable, referenceable technical standards.  
They have 12-13 guidelines that are organized under 4 principles:  
perceivable, operable, understandable, and robust.*

*For each guideline, there are testable success criteria, which are at three levels:  
A, AA, and AAA.” [\[Source\]](#)*

## How does Public Access conform?

---

Public Access has been built using best practices and standards as defined by WCAG 2.1 and conforms to, at least, the relevant success criteria of WCAG 2.1 level AA in-line with current [UK Government requirements](#).

Here is a short list of some of the accessible features presented by Public Access:

- Clear page titles for better orientation.
- Alternative text detail for images (“alt text”) and other non-text elements.
- Consistent and clear use of headings including a semantic hierarchy (as far as possible).
- Association of form controls with labels.
- Clear form error messages in proximity to erroneous form fields.
- Association of all data cells in a data table with their headers.
- Meaningful text for hyperlinks (and a title attribute, where applicable).
- Forms follow a logical order and can be navigated using a keyboard (e.g. Tab key to move between fields).
- Sufficient foreground and background colour contrast combinations.
- Keyboard navigation for menus and calendar controls.

## 2. WCAG compliance checklist

The tables below summarise the compliance of the Public Access 3.x product with the relevant WCAG criterion. Criterion specifically introduced as part of WCAG 2.1 is highlighted and suffixed using [\*] tags.

### Note on checkpoints

The checklist points below have been adjusted to remove AAA checklist items.

Whilst Public Access does not claim a AAA level of compliance, where relevant and where possible, AAA checklist item criterion have been considered throughout the development of this product.
